It was *inter-alia* stated in the terms and conditions of allocation that whether the block could be operated as one mine or otherwise would be determined by the Central Government after the detailed explofation is completed, having regard to factors such as the interest of conservation, safety, deployment of optimal technology for optimal extraction of coal, mine capacity, the earliest commencment of production etc. Since, the detailed exploration in this block has not been carried out so far, it is not possible to examine the possibility of dividing the block into two parts at this stage.
